Councilmember Pennington thanked the Authority and residents for participation in the Memorial Drive Drainage and Mobility Improvement Project Town Hall meeting held on April 14, 2015. He encouraged the Board to adopt a comprehensive street and landscaping improvement plan. He also encouraged the Board to preserve the residential nature of the area within the Authority boundaries by incorporating more sidewalks and bike lanes and maintaining narrower esplanades.

Ms. Virginia Gregory thanked Councilmember Pennington for his support of narrower esplanades in the area. She requested that Director Hamilton present a more detailed report on proposed Authority drainage projects at future local interaction group meetings. She also expressed concerns over certain ABHR billing narratives and requested more specific details be included in the Authority's minutes.

Mr. Robert Benz recommended that more forums like the Memorial Drive Drainage and Mobility Improvement Project Town Hall meeting be held for future Authority projects. He then presented feedback and suggestions on design specifics for the Memorial Drive Drainage and Improvement Project, including the construction of an 8 foot multi-use path on both sides of the Drive. He expressed concerns over the proposed 18 foot median for the esplanade stating that an 18 foot esplanade median may not provide a large enough turning radius for larger vehicles to make U-turns.

Mr. Ed Browne presented feedback and suggestions on design specifics for the Memorial Drive Drainage and Improvement Project, stating that he is in support of an 18 foot median as it encourages a more residential design to the neighborhood and would discourage the addition of another lane in the future. He suggested the construction of 10 foot sidewalks along the drive with the installation of trees between the sidewalks and the roadway and the construction of detention facilities under the sidewalks. Mr. Browne then discussed Briar Branch Creek detention calculations and operations.

Ms. Roberta Prazak presented feedback and suggestions on design specifics for the Memorial Drive Drainage and Improvement Project, stating that she is also in support of an 18 foot median as it encourages a more residential design to the neighborhood. She suggested that commercial developers within the Authority boundaries finance additional detention facilities, particularly additional underground detention facilities.

Ms. Donna Freedman discussed her concerns regarding an increase of traffic in the neighborhoods as a result of the Memorial Drive Drainage and Mobility Improvement Project. She encouraged the Board to focus efforts on drainage projects instead of roadway improvements. Councilmember Pennington stated that the City of Houston does not review drainage issues on a watershed basis, but on a macro basis and requested that residents report personal flooding to the 311 notification phone number for public works records and future drainage analysis. He asked that the Authority make construction of a detention basin south of I-10 a priority and also discussed the drainage ditch constructed by the Village of Bunker Hill.

Mr. John Haslam discussed the Authority's proposed median on Memorial Drive, noting that he believes it creates additional and burdensome traffic for residents of Legend Lane and additional drainage into W-153 endangering the homes of the residents of Legend Lane. He presented correspondence from the Legend Lane Townhouse Association regarding same, a copy of which is attached to these minutes.

Mr. St. John also discussed high water marks in the W-151 detention basin and noted that banks for the basin are higher than surrounding areas. 10. Receive the TIP Call for Projects update from the Goodman Corporation.

## MEMORANDUM

**TO:** Memorial City Redevelopment Authority  
**FROM:** Jim Webb, The Goodman Corporation  
**DATE:** June 30, 2015  
**SUBJECT:** TIP Call for Projects Status Update

In January 2015 the Memorial City Redevelopment Authority (MCRA) submitted funding applications to the H-GAC Transportation Policy Council for the following MCRA projects:

| Project                       | Project Limits                   | Total Project Cost | Funding Request |
|-------------------------------|----------------------------------|--------------------|-----------------|
| Memorial Drive Reconstruction | BW8 to Tallowood                 | \$13M              | \$10.4M         |
| Town and Country Way          | Extension to BW 8 and Roundabout | \$6.6M             | \$5.3M          |
| N. Gessner Phase II           | Westview to Long Point           | \$2.7M             | \$2.2M          |

The Goodman Corporation (TGC) has been monitoring the selection process through attendance at H-GAC Advisory Committee and Policy Council meetings, and coordination with H-GAC staff. Part of this oversight includes coordination with H-GAC staff in order to provide additional information and updates on project development through the project evaluation process.

Recent information from MCRA engineers and staff has made it clear that the current scheduled construction date of Town and Country West (October 2015) will not allow for the application of federal and state resources without substantially delaying the project. The current H-GAC timeline suggests that a funding decision will be made in September 2015. In addition to this, an Advance Funding Agreement must be entered into with TxDOT prior to the application of federal/state resources. The development of this agreement typically takes between 6-12 months. In addition to this, the project plans will require a review by TxDOT engineers, which will take approximately 2-4 months. As such, the utilization of federal and state resources will require that the construction phase of this project be delayed until anywhere between June 2016 and February 2017.

Because of this delay, and because of the other MCRA projects under consideration by H-GAC, TGC recommends to the MCRA Board that the Town and Country Way project be removed from consideration for funding. This will allow for the Town and Country Way project to move forward as scheduled and will allow us to focus our efforts on securing funding for the Memorial Drive and N. Gessner Phase II projects.

11. Receive an update on the West Beltway 8 Shared Use Path proposal.

# PROPOSED W BELTWAY 8 SHARE USE PATH PLAN AND CONNECTIVITY

## Legend

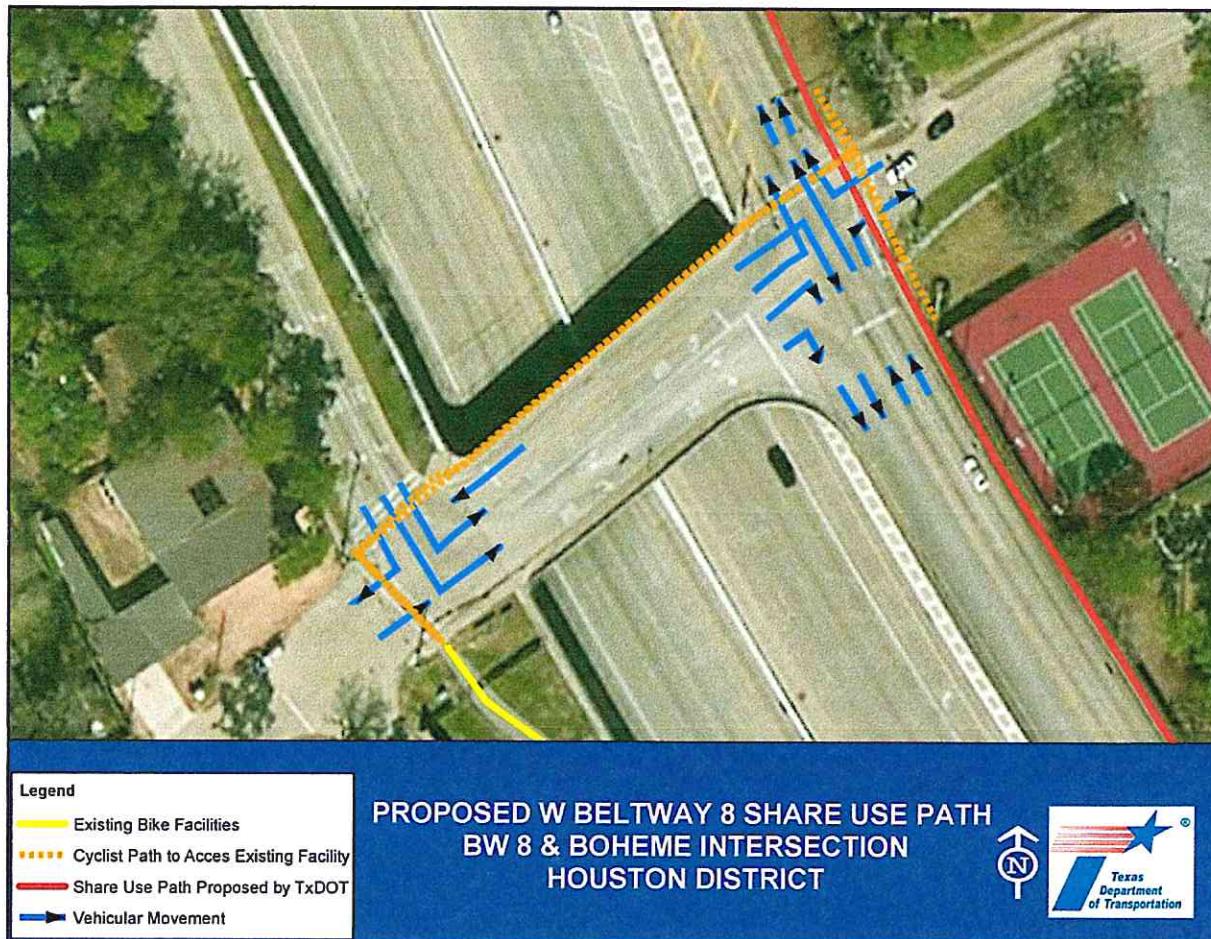

- ★ Metro Bus Stops
- Yellow line Existing Bike Facilities
- Red line Share Use Path Proposed by TxDOT

**HOUSTON DISTRICT**

### **W Beltway 8:**

The proposed project eliminates a barrier to pedestrian and bicycle mobility in crossing BW 8, since it provides a safer and more convenient alternative route for people on the east side of BW 8. The pedestrian signals indicate where crossings for pedestrians and cyclists should occur. In the map below, the orange dashed line indicates the actions that pedestrians and cyclists from residential developments on the east side of BW 8 would have to take at signalized crossing locations to access the existing shared use path (yellow solid line) on the west side of BW 8. Following this path, versus using the proposed shared use path (red solid line) on the east side of BW 8, increases the crossing distance for cyclists, as they would have to cross three or four busy street intersections instead of one.

The proposed BW 8 shared use path on the east side (red solid line) limits pedestrian and cyclist exposure to conflicting vehicular traffic turn movements at BW 8 and Boheme Dr (blue arrows depict permitted traffic movement). The map above shows how complicated and busy these intersections at BW 8 and Boheme Dr are, in part due to:

- Left-turning traffic and right-turning traffic on the west side of BW 8;
- The frontage road dead end on the west side of BW 8, requiring all vehicles to turn;
- Multiple intersection crossings, at BW 8 and Boheme Dr, for cyclists and pedestrians traveling to the existing shared use path on west-side.

Also, the intersections are skewed, which may limit lines of sight between drivers and pedestrians on the intersection corners and crosswalks. Turning speeds of vehicles may pose additional safety concerns. The combination of roadway traffic volumes, speed, turning speeds and turning movements create poor conditions for walking and cycling across BW 8. The proposed project eliminates a barrier to pedestrian and bicycle mobility in crossing BW 8, since it provides a safer and more convenient route.

This project also closes a gap in the existing bicycle network. The proposed facility closes a gap in the existing bicycle transportation network by connecting the Terry Hershey Hike and Bike Trail with CityCentre, Town and Country Village, and the Memorial Bend and Briar Grove Park residential communities. The proposed facility will connect Memorial District and the Energy Corridor District via the Terry Hershey Hike and Bike Trail.
